

IranOpen 2015 3D Soccer Simulation League Presentations

All teams, including the remote ones, should prepare a 20 minutes presentation in English about their team for IranOpen 2015 competitions. Teams who do not provide a presentation will be eliminated from the competitions after the seeding round.

Each presentation should clearly cover the following subjects:

1. Team Introduction (including previous results/contributions): less than 5 minutes
2. Biped Locomotion Method
3. Localization and Noise Reduction Method
4. High Level Skills

Teams can cover other subjects in addition to the above.

Keep in mind that the target audience for the presentations are 3D team members.

The best presentation is selected based on votes of teams and TC members.

Teams will give their presentation after the seeding round in an official meeting among 3D teams according to a schedule that will be announced later.

* Remote teams should send either a video (can be a screencast video of your slides + your voice), or a presentation file in PDF or ODP format (PPT is also accepted, but will be presented using LibreOffice) accompanied by an audio file of your voice.

The deadline for remote teams is April 7th.
